X431PRO Actual Measurement: 2009 Dodge Journey Body Control System Replaced Tire Programming Method

Function Description:

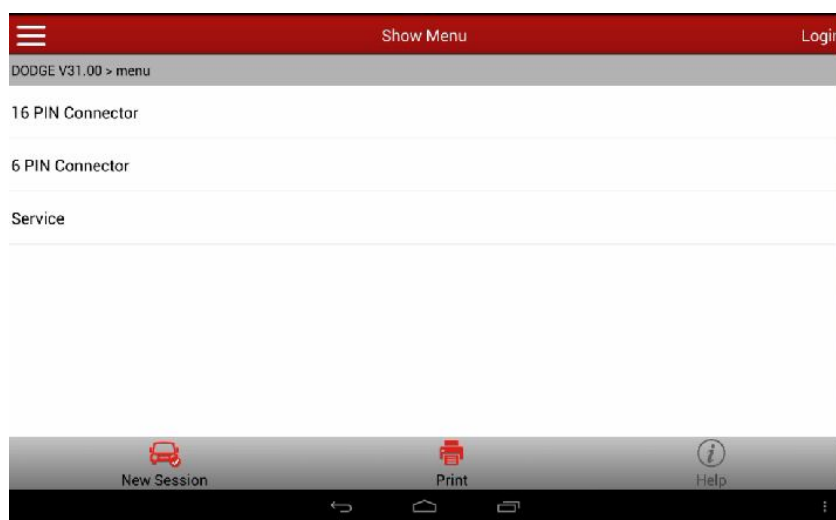

This function is applicable for a vehicle whose tire is replaced.

Prerequisites:

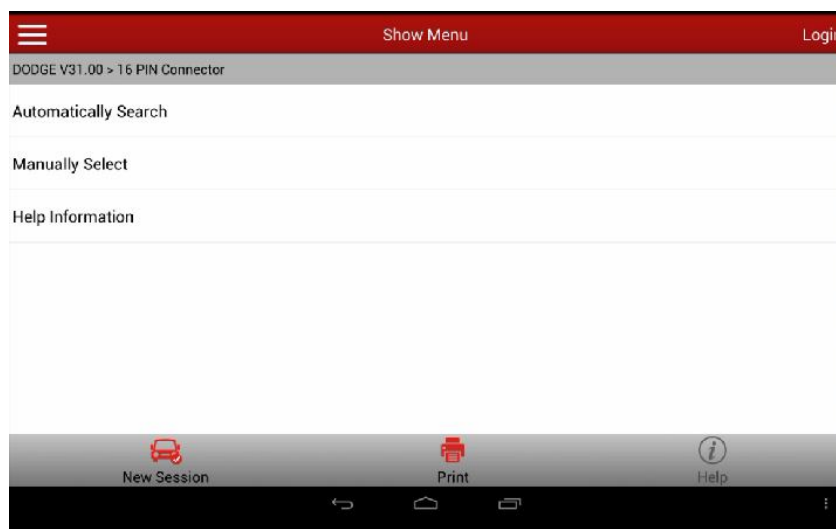

1. The battery electric quantity is sufficient.
2. The ignition switch is ON.

Procedure:

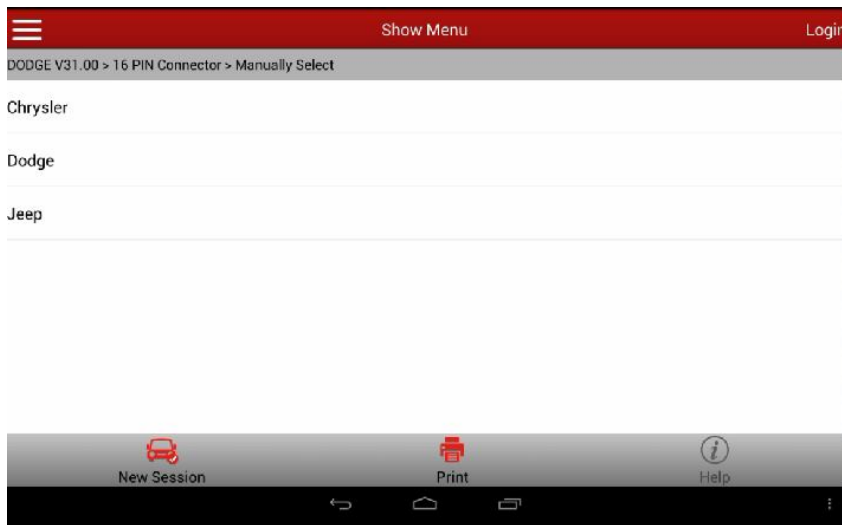

1. Choose Dodge software V30.30 or a later version.
2. Choose 16-PIN connector.

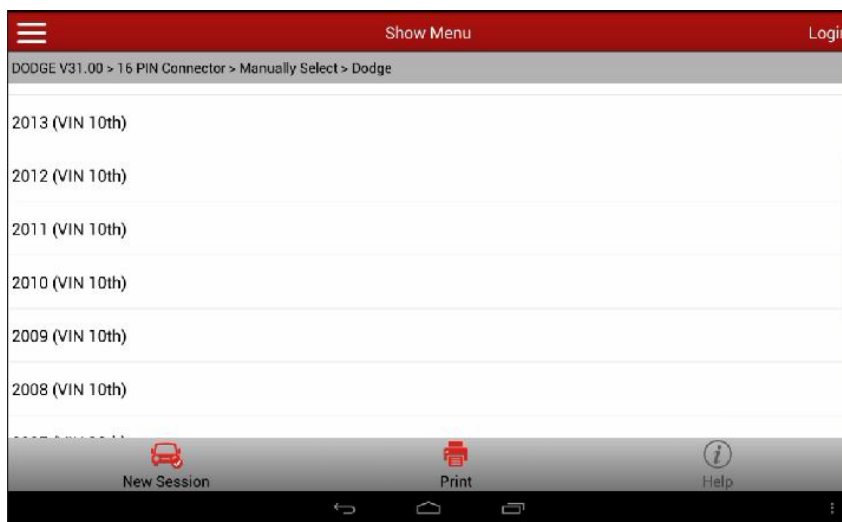

3. Choose manual selection.

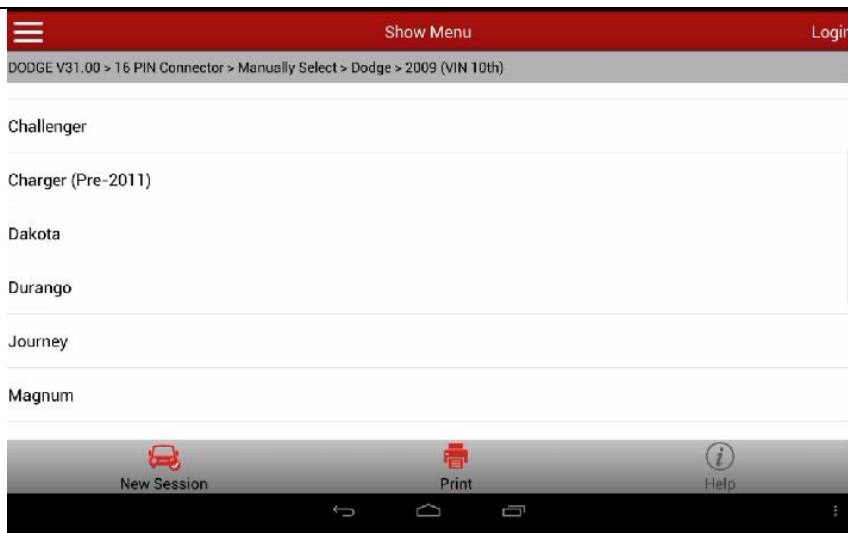

4. Choose Dodge.

5. Choose 2009(VIN 10th).

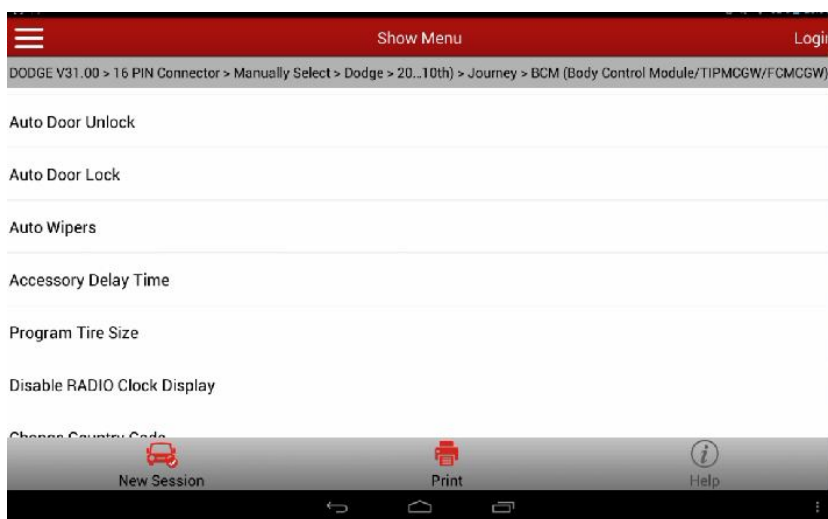

6. Choose Journey.

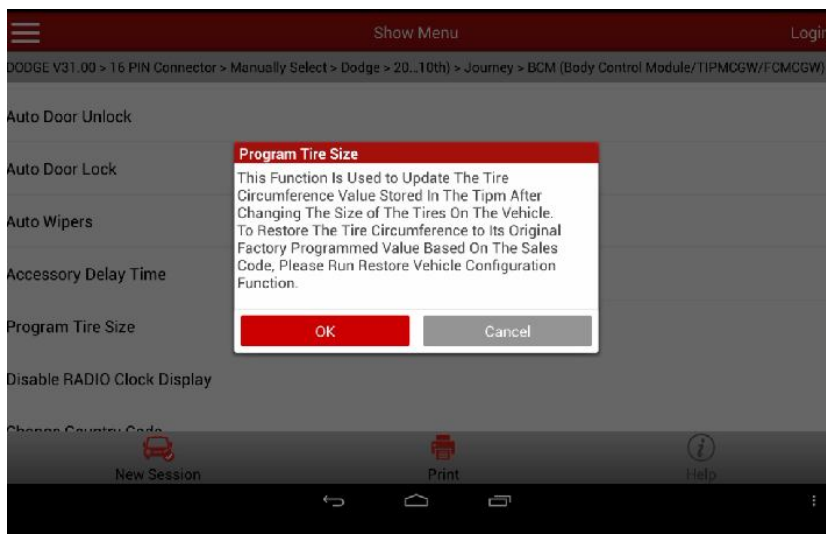

7. Choose the BCM system.

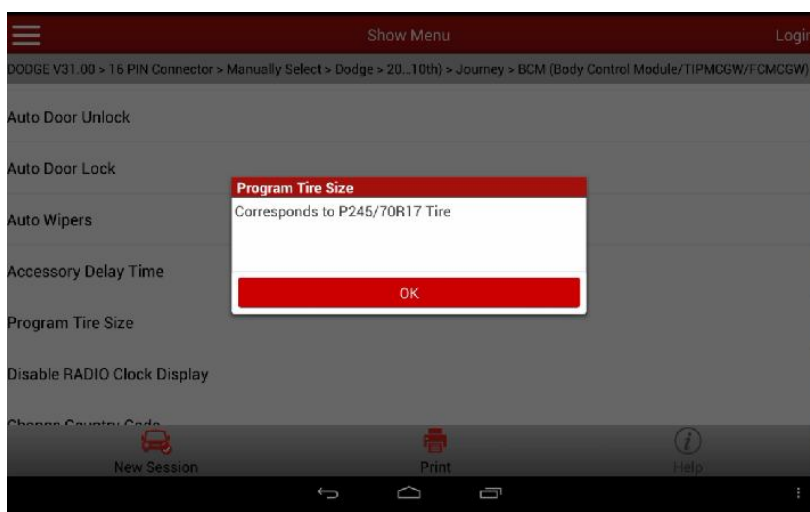

8. Choose the "Program tire size" function.

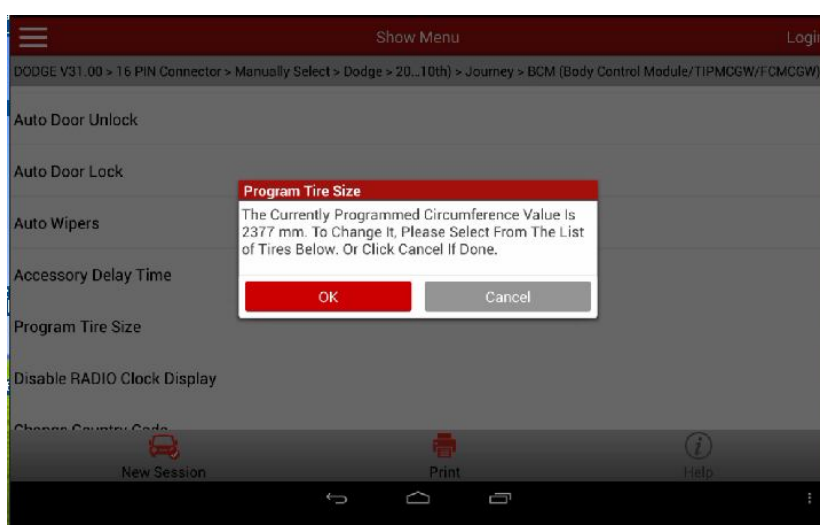

9. Note the description of the "Program tire size" function.

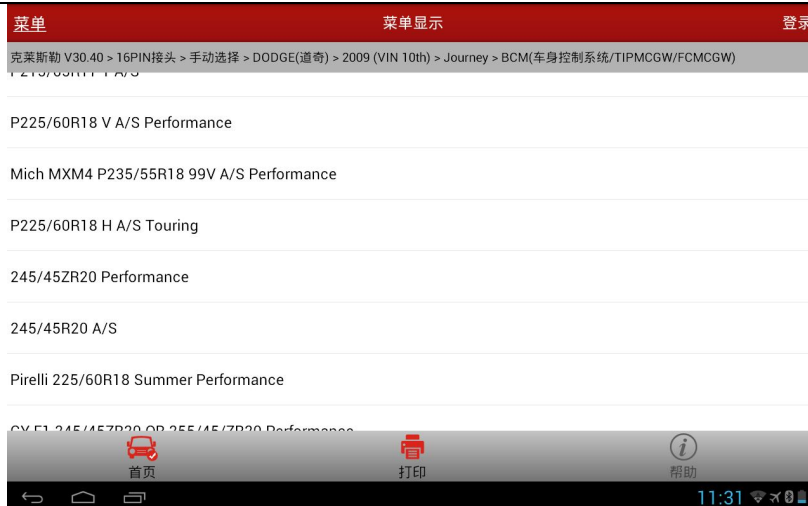

10. Click OK. The model of the current tire is displayed.

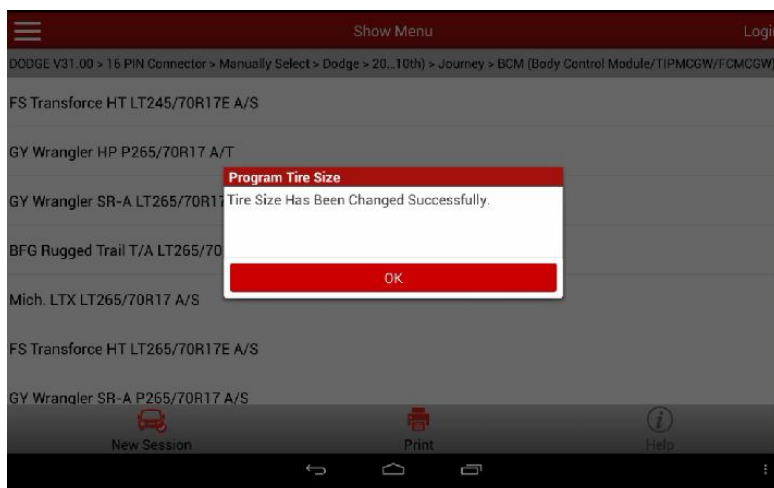

11. Click OK. The message "The currently programmed circumference value is 2377. To change it, select from the following tire list" is displayed.

12. Select the correct menu according to the replaced tire.

13. A programming success message is displayed.

14. After programming is successful, clear DTCs.
